

DIY Origami "Christmas paper doll house"

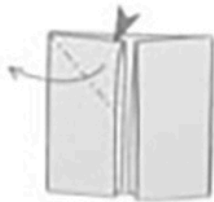

Print page 2 or 3, then color and carefully assemble according to the instructions.

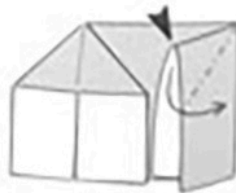

1. From the vertical position of the print-out (colored side up), fold the paper in half horizontally.

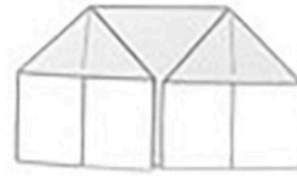

2. Fold the left side in to meet the center fold.

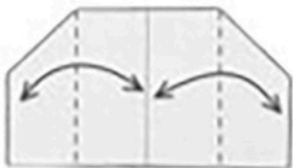

3. Fold the right side in to meet the center fold.

4. Open the left side with the inside facing up. Bend the top. Crease the fold flat. There should be a roof triangle on top.

5. Repeat for the right side. The right triangle of the roof should be equal to the left triangle.

6. Turn the paper over.

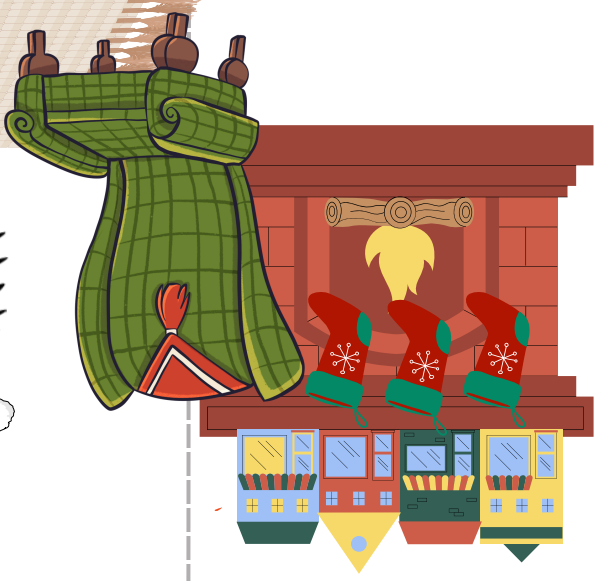

7. Repeat for the right side. Lift the doll house and make sure the sides are at right angles. For the house's stability, glue the triangles of the roof.

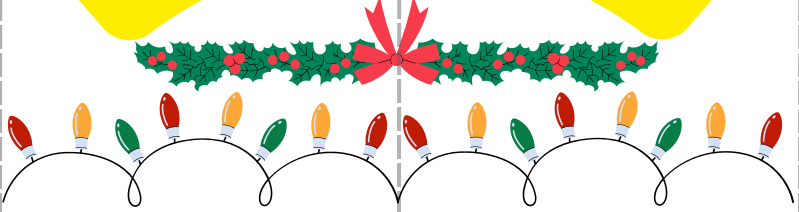

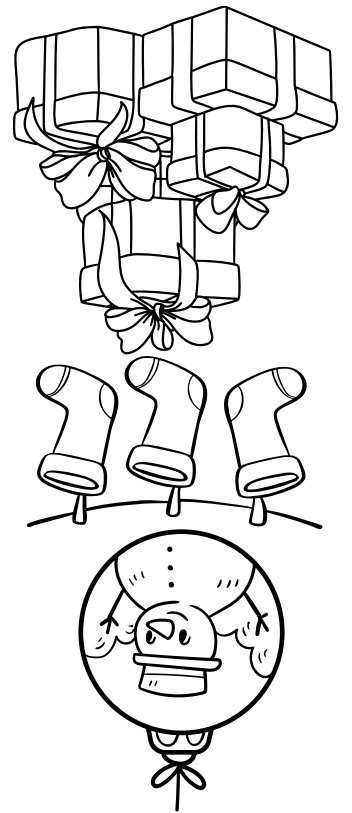

9. Color with crayons and bring your small toys in.

Have fun!
